

Sliding Cavity Door Sets

Circular Sliding Cavity

Door Locks

A stylish addition to the Gainsborough range, this circular sliding cavity door lock will complement any style of home.

Suits 54mm diameter hole through door face for quick and easy installation.

Also features hinged pull-tab on face plate which can be raised to pull door closed from within cavity.

Suits doors 32mm–45mm thick.

Functions available:

395 Privacy Set*

Lock or unlock with turn-button from inside; emergency release from outside. Ideal for bathroom/en-suite doors.

396 Passage Set*

Non-locking for general passage operation.

397 Connecting Set*

Lock or unlock with turn-button from either side.

398 Box Staple*

Use in conjunction with 395 Privacy set or 397 Connecting set where the door slides adjacent to wall (no cavity). The box staple is affixed to frame/architrave and protrudes to allow latching on door closure.

***Champagne Nickel available in standard pack only.**

Applies to 395, 396, 397 & 398 products.

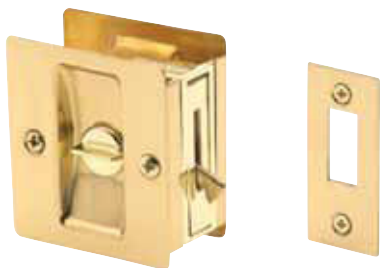

Rectangular Sliding Cavity Door Locks

393 Privacy Set
