

OPTIMA

Australian timber at its best

A joinery door with a difference - Optima features the very best in Australian timbers with its choice of visually stunning panel inserts including exotic species such as Blackwood, Tasmanian Oak, Myrtle, Sassafras and Ash in complementary combinations. Inlay panels are enhanced with ultra slim strips of brushed aluminium on both door faces.

Sassafras, unlike other timber species, varies widely in appearance from one panel to another. It's the choice for individualists, not those who seek uniformity.

Part of the JELD-WEN® family
