

SOHO

Simple but oh so sophisticated

SoHo takes the contemporary flush door to a new level and gives it a total glamour make-over using premium quality veneers such as Ash, Blackwood and Myrtle.

To make them even more visually striking, strips of black laminate and brushed aluminium are used as accents creating clean lines and visual impact.

The five designs in the SoHo range punch well above their weight in creating a modern, streamlined look, with top quality flush construction featuring select hardwood stiles and William Russell's SoundCore™ technology cuts down sound transmission while offering light weight yet sturdy construction qualities.
